PERSONAL ACHIEVEMENTS

Athletics: 1st Dan **Black Belt** Diploma in Karate from Bangladesh Karate Federation

Arts: Independent artist with over **30** paintings sold through networking and client referrals.

PROJECTS

Online Sales Data Prediction Model (Python)

- Cleaned and preprocessed dataset using Pandas (duplicate removal, missing value handling).
- Applied label encoding and feature scaling.
- Trained and evaluated an SVM classifier using train/test split.

Cryptography Program (C++)

- Built a program that encrypts and decrypts messages via 2x2 Hill Cipher (matrix multiplication).
- Managed complex mathematical operations in code, including calculating the determinant and adjugate matrix for decryption keys within a modular system.

Bookstore Management System (Python)

- Developed a Python-based client-server application implementing CRUD operations via an API. Designed the server to manage and store data for customers and books in text files.
- Built a client console interface allowing interaction with the API for adding, updating, retrieving, and deleting records.

Bookstore Management System (Java)

- Developed a small program using Java Swing with inventory management, customer billing, and organized GUI components.
